I'm only using because I have no choice New

- **Forum name:** #Feature Request

I'm only using this reader because I have no choice. Is the reader AHA is using for its books. I has no text to speech, pages can only be read either single page or side by side. No top to bottom (flip over flow). No multimedia support. I'm only using because I have no choice but I'm contacting AHA to complain about how limited unimpressive this reader is. For future reference I think I am buy hard copy and then scan each page individually into a readable (text to speech), able to copy and paste and I get better use in the long run.
