Reading your eBook on your PC / Mac:

1. Open the site <http://jlgebooks.com/> on the default browser on your iPad/android tablet

2. Once you are logged into the institution/library, click on Login next to the welcome message and login with your username and password.

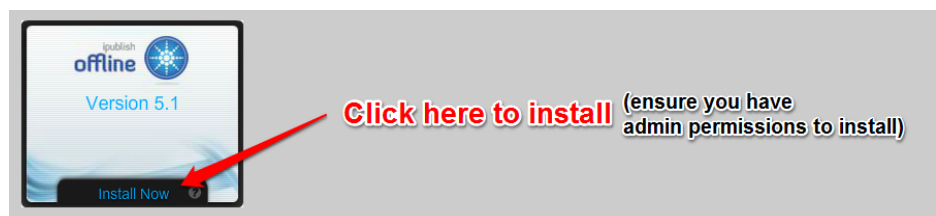

3. You will be redirected to the Bookshelf screen
4. Check Out the books that you wish to download.

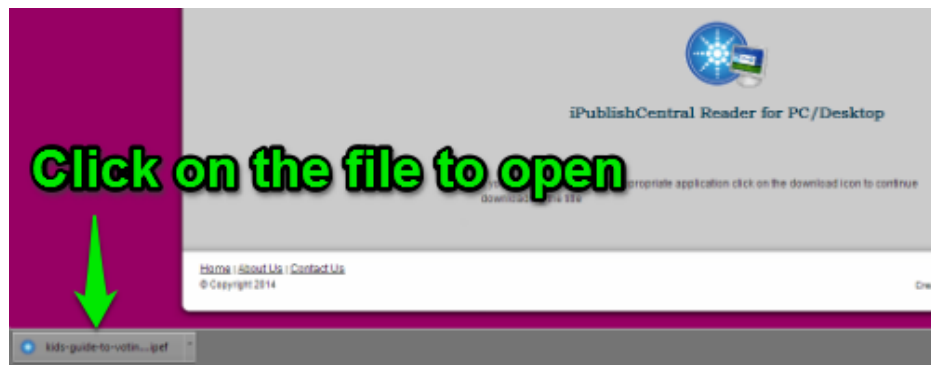

5. Once you have Checked Out the books, you will see a Read Offline button next to the title.
6. Click on it and you will be redirected to the download page.

7. Based on the device(PC/Mac) the site will let you know the reader that you need to install.

8. Reader will open with a message stating No Books downloaded.
9. Go Back to the bookshelf to download the book

10. Click on the Read Offline option to download the book.
11. If you are on a PC/Mac, the file will get downloaded and you can click on it to open in the iPublishCentral Reader directly.
