Issues with builder books download of offline program

Roshan - 2023-06-09 - Comments (0) - NAHB- Builder Books

Question:

Good Morning! I am trying to download the offline program to read my ebook purchased last week. I only get errors when I click on the download icon, and when I manually try to download the file I get a file with no extension, so my computers cannot open. My computers are running Windows 7 64 bit OS.

I look forward to hearing from you and getting help!

Thanks

Answer:

If you are having trouble downloading or installing **iPublishCentral Reader**(Previously iOffline Reader), Please clear you cache and cookies and try downloading again or try using a different browser(ex :[Mozilla Firefox](#)). (Google Chrome will cause difficulty during installation as it has compatibility issues). Also ensure you have updated version of [Adobe Air](#) / [Adobe AIR 3.5](#) on your computer.If you are still facing issues please send us screenshots along and browser details.

iPublishCentral Reader is based on Adobe Air and the file download extension of (.air).
