Trouble installing on Adobe Digital Editions on Mac OS

Roshan - 2023-02-04 - Comments (0) - Adobe Digital Editions

Try this first

Use a different browser to download Adobe Digital Editions from [Adobe.com](https://www.adobe.com):

- Mozilla Firefox: <http://www.mozilla.com/firefox/>
 - Microsoft Internet Explorer: <http://www.microsoft.com/windows/internet-explorer/default.aspx>
 - Apple Safari: <http://www.apple.com/safari/download>
-

Uninstall previous versions of Adobe Digital Editions for Mac OS

You must have administrator privileges to complete these steps.

- From your user directory, locate `/Library/Preferences/Macromedia/Flash Player/www.macromedia.com/bin/open`.
- Drag the `digitaleditions1x5` folder to the Trash, and empty the Trash.

Manually install Adobe Digital Editions for Mac OS

- Finish installing or uninstalling any other applications.
- Uninstall any earlier versions of Adobe Digital Editions.
- Download the installer package for your Mac OS X machine:
 - Intel-based Mac: [Adobe Digital Editions 1.7.2 for Intel-based Mac](#)
 - Mac PPC: [Adobe Digital Editions 1.7.2 for Mac PPC](#)

Note: If you clicked the wrong Mac OS X platform, an error

message appears. Close the message box and click the correct link to restart the installation.

- Click Open in the File Download screen to start the installation.

Note: *If your connection times out, click Save, instead of Open, to save the installer package to your desktop.*

- If necessary, unzip the .zip file. If you're using Safari as your browser, or if Firefox is set up to unzip files, the file unzips automatically.
- Double-click the .pkg file to start the installer, and follow the onscreen instructions.

Note: *If your connection times out, save the installer package to your desktop. (Click the link for your Mac OS X machine, and then click Save.) Double-click the file to start the installation.*
