Market Drivers/Future Outlook

The nursing application IT application market has been and will continue to be impacted by:

- The need to improve, and be able to report on, quality outcomes and ARRA measures to meet increasingly detailed claims documentation requirements and qualify for performance-based reimbursement bonus payment.
- The need to improve patient safety.
- Intense competition for limited IT solutions.
- In this competition, nursing documentation purchases should fare better, since they include functions which are essential for hospitals to meet the ARRA meaningful use criteria, measurements and reporting requirements.
- These systems, especially nursing documentation and EMAR, have proven to be nurse-satisfiers, thus aid in recruiting and

Chapter One

Tassin gazed across the darkening land as the sun's afterglow faded. The distant forest grew gloomier with every passing minute, and she shivered, wishing the strange wizard, Manutin, had not insisted that she meet him there alone tonight. The forest, with its haze, twisted trees, frightened her. Legends abounded of werewolves who dwell in its dark confines and emerged at night to seek human victims.

Turning away from the dusky vista, Tassin gazed across the grey stone battlements. The sentries' armour glistened in the light of newly kindled torches. They stood like statues, their broad faces blank, but for all she knew they could have been the cook's cousins, since there were so few of her trained soldiers left. Most had perished over the last two months. She wondered how long it would take for the last remnants of her once-great army to lose hope and flee before they too were slaughtered on the battlefield. Demons had been fleeing the castle for days now, vanishing from their posts in the dead of night.

Three months had passed since her father's death, and she still missed him terribly. She now ruled the largest and most beautiful of the five kingdoms, and was the prey of the three sword kings' ambition to rule Arin. They had come courting, and Tassin shuddered as she recalled their bungling attempts to impress her. Fat, bearded Barlock, who smelt of wine and dogs. Old, widowed Grisson, thin and lecherous, who sucked at his food with a toothless mouth. The memory scoured her stomach. All her hopes had rested upon the young, handsome King Torrian, the only one she had even considered, until she had found out that he was a rapist and woman beater.

The fatal glint in his eye had become obvious when she had been informed of his true nature. Her principal lady-in-waiting, Royanne, had told her tearfully, aware that she was dashing the young Queen's hopes for a happy marriage. During his stay at Alrade Castle, Torrian had attacked one of the serving maids, and his retinue had spread surreptitious whispers of his appetites. The rumours were not supposed to reach Tassin, but Royanne was an able spy, unearthing anything potentially harmful to her monarch.

Tassin sighed, her eyes sweeping the night-shrouded land. The law said that she must have a husband of noble blood, and the kings could force her to wed one of them if she did not choose a suitable spouse. They had pointed that out repeatedly, and, since there were no princes of royal blood apart from Prince Victor of Olgara, her choice was limited. Olgara was a poor kingdom bordering the badlands that relied heavily on trade to survive, and it could not jeopardise its alliances with the other kingdoms. Prince Victor had not offered a suit, and King Xavier, his elder brother, had sent only a letter of condolence. She wanted none of the three available kings, however, and had announced it boldly to their faces.

Torrian had been the most outraged, swearing to tear down her castle and drag her to the altar by her hair, as the law allowed. In desperation, Tassin sent invitations to all the unwed noblemen in her kingdom of marriageable age. All but one had declined, and he, a young kiel from the southern part of her kingdom, had been waylaid and killed, apparently by highwaymen. She knew that the three kings had used threats and blackmail to prevent the suitors from accepting her invitation, and in the case of the bravest, had resorted to murder. In the face of this bold treachery, she could do nothing but reiterate her refusal of their offers and weather the storm that followed.

Torrian had sent a party of men to kidnap her from her bedroom, but they had been discovered and executed after confessing their mission. In a fury of fear and defiance, Tassin had ordered her soldiers armed and mobilised to defend her borders, preventing spies and would-be kidnapers from entering. After she had foiled two more attempts with these tactics, Torrian had joined with the other kings to fight their way to her castle and carry her off by

Figure 14: Highlighted text in an eBook

b. Filter the Highlighted text

1. Click   at the left side of the reader

2. Click **My Highlights**

A list of Highlighted text is displayed

3. Enter the text or a word in the **Search Highlight** field.

A list of searched text or word appears.

c. Delete the highlighted text/paragraph

1. Click   at the left side of the reader
2. Click **My Highlights**. A list of Highlighted text is displayed
3. On mouse over for the specific Highlighted text,   appears
4. Click on   to delete the highlight. A pop-up appears for confirmation
5. Click the **Yes** button to delete the highlight else click **No**

d. Copy Text

You can copy the text from the reader and paste it on to any of the programs that accepts text.

1. Click   to select the text in an eBook
2. Select the text to be copied
3. From the pop-up menu that appears, click the **Copy text** option
4. Paste the text in the program of your choice, that accepts text

The content can be copied only from a single page at a time.
