

## How to take a screenshot of your iPad or iPad Mini

Roshan - 2014-02-07 - 0 Comments - in General

This very brief tutorial will show you how to take a screenshot using your iPad, and how to transfer it to your PC or Mac.

The process is actually exactly the same as it is with an iPhone or iPod Touch.

- Click the Power button on the top right corner of your iPad, and while holding it down, click the “iPad Button”.

- You’ll see the screen ‘flash’ white and hear a camera ‘clicking’ sound.
- Now open the **Photos** app on your iPad.

- You’ll see the screenshot you just took as a thumbnail.
- Tap that photo to view the screenshot.

- The easiest way to transfer a screenshot to your PC or Mac is to email it to yourself.
- To do so, tap the “arrow” button on the upper-right corner of the screen while you’re viewing the screenshot.

- Select **Email Photo**

- Mail will automatically open with the image attached to a message.
- Just fill out the address you want to send it to, give the email a subject and enter any info you want in the body of the message. Then click **Send**.
